(54) Title: WELLBORE DEVICE FOR SELECTIVE TRANSFER OF FLUID

(57) Abstract: A wellbore device is provided which comprises a fluid pas-
sage (34) for transferring fluid between an earth formation (4) and a surface
facility, and a body (42) transferable from a first mode to a second mode
upon contact of the body with a selected fluid. Said body is arranged so as
to substantially close the fluid passage upon transfer of the body from the
first mode to the second mode due to contact of the body with the selected
fluid.
